

# Benefits of Color Printing in Mary Ann Liebert, Inc. journals

- Figures will not lose any of the critical data contained in the image(s).
- Color images tell a more complete story than grayscale images, and are easily interpreted—particularly in complex data plots—which readers appreciate.
- Color figures increase the credibility of your work.
- Vibrant figures will call special attention to your work, and potentially increase citations of your article.
- Your article will stand out over other articles that do not contain color figures within the issue, heightening visibility.
- We will send you 5 print copies of the issue in which your color figures appear.
- If your color figure is chosen for the journal cover, you will receive a complimentary plaque with the cover to hang in your lab or office.
